iimt Platinum-Partners

iimt at a glance

iimt Network

The extensive network of approximately 100 professors, specialists, partners and the strong iimt-alumni network promote personal development, social relationship and professional contacts.

Susanne Ruoff,

CEO BT Switzerland and former iimt student:

"The iimt provided me with good and intensive further training and education and broadened my knowledge of a range of different business topics – especially in

Finance. During my studies at the iimt I had access to excellent teachers and was always supported by the iimt staff. Last, but not least, I expanded my personal network with a lot of new colleagues."

Marcus Madelung,

Sales Director Sprint Germany and iimt student:

"To prepare for the changing environment within our ICT industry, future leaders need to combine a high level of educational expertise and with practical excellence to respond strategically, beyond operational issues, to the challenges of a more and more transforming world. The iimt provides, with its modular learning concept, the

educational foundation. It merges world class lectures, in their respective area, with motivated and experienced students from all over the world to provide a forum of excellence. The student exchange programme, e.g. with Cambridge's Judge Business School, completes a good learning experience."

Prof. Dr. Alfred Mettler,

Subject Area Coordinator Managerial Finance:

"The coordinators of each subject area are academic experts in their domain. They are responsible for developing an up-to-date curriculum, addressing the relevant

topics, inviting industry guest speakers, and integrating the contents of the different modules in order to guarantee a unique learning experience for the participants."

Chair of Management in Information and Communication Technology (ICT)

University of Fribourg

Prof. Dr. Stephanie Teufel, Director of the iimt holds the Chair of Management in ICT which is part of the Faculty of Economics and Social Sciences at the University of Fribourg. The chair offers university lectures, supports bachelor, master and doctoral theses and conducts research.

Research Fields

The chairs' research team works together with industrial partners, so its research is not confined to the classical "ivory tower". Based on the Fribourg ICT-Management framework the research team aims to answer challenging questions in the academic research fields:

- Energy System Management
- Innovation and Technology Management
- Information Security Management
- Project Management

Research Publications

The team is motivated on bridging the gap between theory and practice. Annually, the research team publishes its results in international journals and conferences. The scientific papers are subject to double-blind peer-review processes. The best of them will be published in the iimt University Press.

Research Partners

The chair holds active roles in several national and international organisations.

The research conducted by the chair is mainly driven by industrial projects. Hence the chair enjoys invaluable support from several membership organisations, as well as strong co-operations with different Universities in Switzerland and abroad.

Within the last years, the chair has accomplished research projects with several organisations.

Competence Center

The international institute of management in technology (iimt) is a leading competence center for Information and Communication Technology (ICT) and Utility (electricity, gas and water) Management, offering executive training programmes and research. Through its highly developed international network of partners, from both industry and the academic world, the iimt constantly improves its competences and takes an excellent and competitive position in the national and global market. The programmes of the iimt are accredited by the Swiss University Conference. To further strengthen its network, the iimt is affiliated with various prestigious organisations. The iimt combines the most recent theoretical management concepts with practical understanding of the international ICT and utility sectors, giving insights into widely different cultures and approaches, and enabling accurate evaluation of conditions in other markets.

Objectives and Commitment

The iimt's commitment is to prepare participants for high-level management careers in an increasingly global ICT and utility environment. The iimt Executive Programmes blend the experience and expertise of an innovative teaching team in developing participants' leadership qualities in both domestic and international business.

Executive Programmes

The iimt offers unique and specialised Executive Programmes in ICT or Utility Management

- The Executive MBA
- The Executive Diploma (DAS)
- The Executive Certificate (CAS)
- The Executive Specialised Courses
- Customised Company Courses
